

Environmental Policy Statement

IntroEase Ltd are dedicated to environmental stewardship, aiming to prevent pollution and reduce the ecological footprint of our operations.

Our commitment involves continuous improvement across all aspects of our organisation, where we strive to identify and implement environmentally sound practices and procedures. Through enhanced working methods, heightened staff awareness, and a steadfast dedication to technological advancements, we seek to diminish our environmental impact.

We pledge to minimise our facilities' environmental footprint, encompassing energy consumption, procurement practices, and building commissioning processes. To achieve this, we will:

Operate in full compliance with environmental legislation and related requirements, ensuring our activities align with environmental best practices.

Foster a culture of environmental awareness and responsibility among our staff and suppliers, encouraging active participation in enhancing our environmental performance.

Reduce consumption of natural resources and minimise material wastage wherever feasible from an economic standpoint.

Set measurable environmental objectives and targets, particularly focusing on areas with the most significant environmental impact and regularly evaluate our performance against them.

Conduct thorough assessments of our environmental performance and transparently communicate the outcomes to stakeholders.

Through these concerted efforts, we endeavour to uphold our commitment to environmental sustainability while delivering essential health and social care services.
